## About me

---

I am looking for a career change and that's why I am interested in a career in IT because it is one of the vast fields on the job market and offers me many career opportunities.

So I am open to any kind of opportunity to launch my career in this field.

Regarding the topic of this internship, I recently started to learn HTML and CSS, completing several projects within the course I take on Codecademy and the basics of JavaScript.

It would be a great opportunity for me to learn in an organized environment with mentors and evaluations to further develop my skills and be prepared to take on a job.

## Other info

---

### Volunteering

IBESO

period Oct 2019 - May 2021

I was involved as a volunteer during college in the student organization IBESO. Within the organization I participated in several extracurricular activities, and among the most interesting activities was the involvement as a volunteer at the UNTOLD festival through the student organization.

And in the last year, with the transition of online education, I was part of and contributed to several webinar projects created by this organization.
